Dear Adobe Talent Aquisition Team,

I am writing to express my interest in the Summer 2025 Software Engineering Internship opportunity at Adobe. With a strong educational background from The University of Texas at Dallas and various Computer Science courses in high school, I am eager to bring my skills and dedication to this position.

Through my academic journey, I have learned various programming languages and technical skills, including Java, Python, C++, SQL, JavaScript, and Microsoft Office. I have completed multiple data science projects covering food access, housing, and supermarket data, which display my knowledge of data analysis and visualization. I have also developed creative renditions of many popular games using Java GUI, showcasing my knowledge of object-oriented programming and problem solving. Additionally, my News Aggregator and Textual Analysis projects emphasize my knowledge of NLP techniques and full-stack web development.

At Adobe, I know that I will have the opportunity to solve real-world challenges, while growing both personally and professionally. My strong work ethic and eagerness to learn make me prepared to take on the challenges of being part of a large and successful company like Adobe. I am thrilled about the opportunity to be a part of your mission and am prepared to discuss how my background, skills, and strengths can be of value to your team.

Thank you for considering my application. I am looking forward to the opportunity to further discuss how I can contribute to your team.

Sincerely,

Joshua Koshy
